REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: independent claims 1-4 are allowed because they all recite a novel, non-obvious loom restarting method.

Faulty weft removal in weaving is known to cause minor weaving faults in the fabric due to various forces including variations in the beating up forces at the restarting of the loom after the faulty weft removal process. The instant invention in all independent claims require that **after the weft removal process**, the loom is angularly reversed to a position where the reed is not in contact with the fell of the fabric and then the loom is restarted. This angular reversal after removal and before restart ensures that the beating up force is as close as possible to the original beat up force, thereby minimizing weaving faults in the fabric due to variation in the beat up force. The general prior art practice is to restart the weaving process at shed closing position when the reed will be in contact with the fell of the fabric.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Muromoto, Jr. whose telephone number is 571-272-4991. The examiner can normally be reached on 8-530, M-F.
